

LV And MV Insulated Mats & Shrouds

Practicable safety for cable jointers, line mechanics and technicians

Insulated mats and shrouds from Boddingtons Electrical provide practicable safety for users by protecting them from hazardous voltages.

- ✓ Flame-retardant, oil and acid resistant HV insulated ribbed and corrugated mats, tested to IEC 61111 for Class 2-4 / 17-36 kV
- ✓ LV and MV switchboard mats to ASTM D178 Type 1/2 Class 2-4 for 450 V to 36 kV
- ✓ 1000 V jointer's shrouding to IEC 61112 Class O, made from 1.5 mm orange elastomer, with flame-retardant bonded Velcro and stitching

- ✓ Rubber insulated 1000 V shrouding to UK specification ENTS 43-103 and ASTM F2320, made from 1 mm orange neoprene with nylon insert for added strength
- ✓ Shrouds for LV underground links boxes that provide insulating barrier, preventing accidental contact, to IEC/EN 60900
- ✓ Line tap shrouds to protect against accidental contact with on insulated conductors
- ✓ Conical, straight and push-on shrouds
- ✓ Insulated clamps
- ✓ Kits made to customers' requirements
