Update 16 - COVID19 Virus Statement – Hiko Power’s Supply Chain remains secure at Auckland Alert Level 3

Hiko Power Engineering continues to manage stock to elevated levels in anticipation of shipping capacity challenges.

Supply of all lines is unaffected at usual demand.

Our main warehouse is in Christchurch and freight deliveries to most of NZ are unaffected (although winds in Picton have affected Cook Straight crossings). We have staff in Auckland with papers to travel and deliver essential goods within the lock down area as required.

If you anticipate increases over usual quantities, or if another supplier has a challenge, please contact your account manager at Hiko Power so we can smooth supply chain continuity. I will continue to advise if anything should change and we will continue to follow official advice related to staff wellbeing and material supply.

Do not hesitate to contact us at sales@hikopower.co.nz if you require more specific information or verification of our stock level for specific items.

Yours sincerely

A handwritten signature in blue ink, appearing to read 'Geoffrey Sullivan', is written over a light blue horizontal line. The signature is fluid and cursive.
