

Connect Your Future

Renewable energy projects with high-quality connection and cable accessories to ensure safety and long-term reliability

A Greener Tomorrow

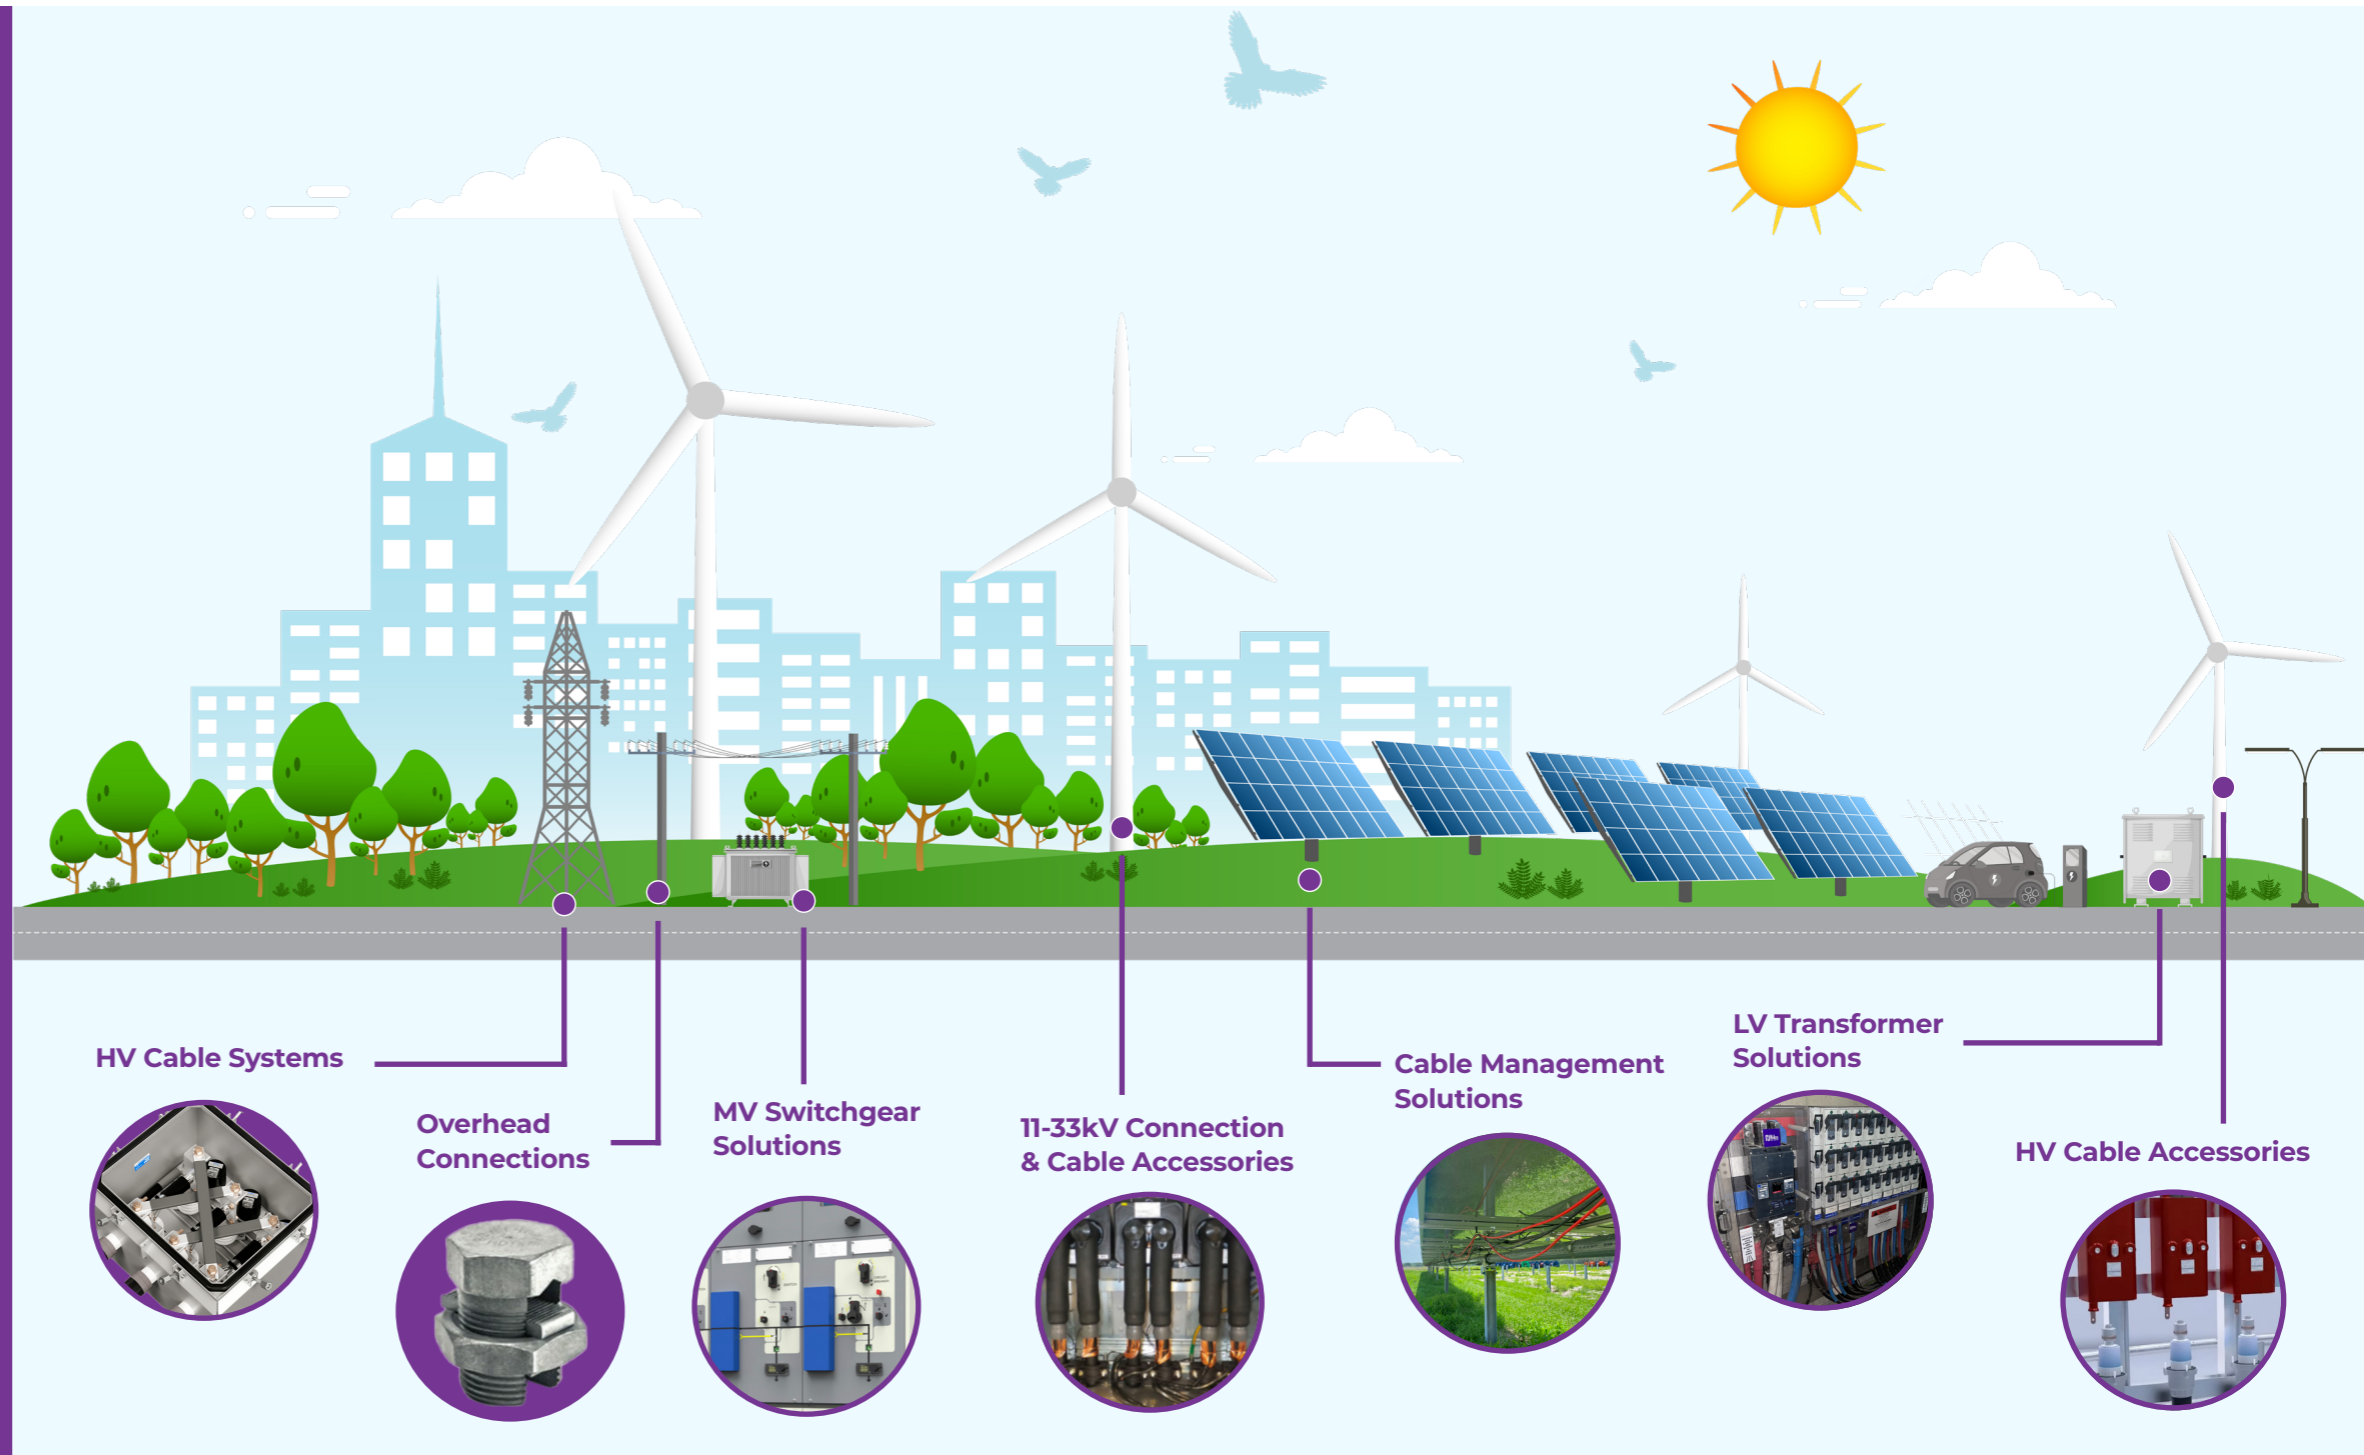

Hiko Power Engineering - helping NZ power the future

Hiko Power Engineering Ltd has been working with DNOs in Aotearoa New Zealand since the 1950's to safely connect our communities to power the future.

Hiko specialises in a wide range of connection and cable accessories and is a key partner for your renewable energy projects providing solutions from the energy source to the end user.

Hiko is the proud New Zealand distributor of global brands like NKT, Pfisterer, HellermannTyton, and Insulect, all experts in the field of renewable connection accessories and cable management solutions which can be custom designed to provide you with the very best, safest and reliable long-term renewable energy connection solutions.
